Ministry of Health closes down Extension 14 clinic

The Ministry of Health has closed the Extension 14 Clinic from today the 22nd September 2015 until further notice. The closure of the 8 hour clinic comes after the ceiling collapsed during the weekend. However it must be noted that there were no patients in the clinic at the time of the incident. In the meantime, members of the public who normally use this clinic are requested to use nearby Government health facilities being Bontleng and Extension 2 clinics. Staff members are present at the clinic to re-direct patients to where their records have been relocated to and answer any questions that patients may want to know. The senior management team visited the clinic this morning. A team of experts will be dispatched to the site to inspect the extent of the damage. The next course of action will be determined by the assessment report.
