

MINISTRY of HEALTH  
REPUBLIC OF BOTSWANA

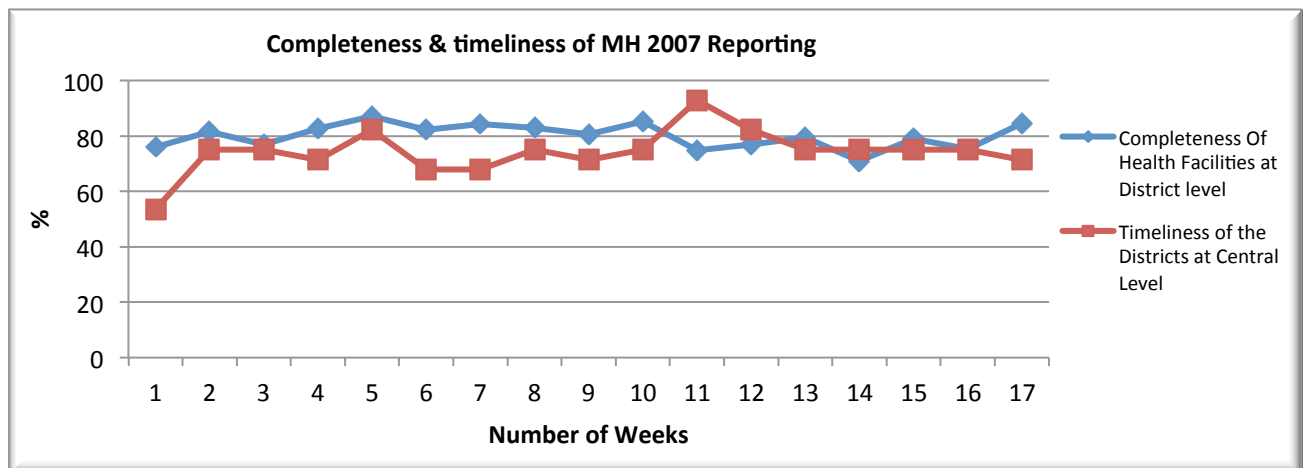

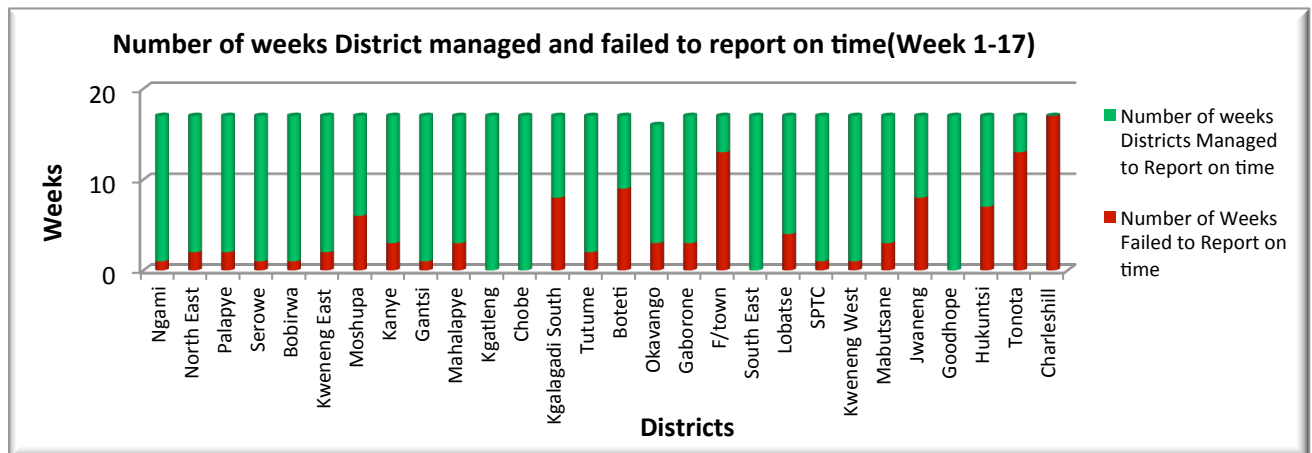

Republic of Botswana  
*Botswana Integrated Disease Surveillance & Response*

17 [Week ending 25/04/15]

- The total number of Diarrhoea cases is below the national Alert threshold; therefore districts are urged to be vigilant in their surveillance activities to detect any unusual increases.
- 5 confirmed malaria cases have been reported for week 17 with nil deaths. Districts are therefore advised to report malaria cases as immediately Notifiable via case based reporting forms and investigate each and every confirmed case.

1.0 Reporting of the MH 2007 Weekly Report of Notifiable Diseases (Week 17)

Figure 1 and 2: Consistency in reporting and Quality of reporting of MH2007

**Completeness and Timeliness of reporting at DHMT:**

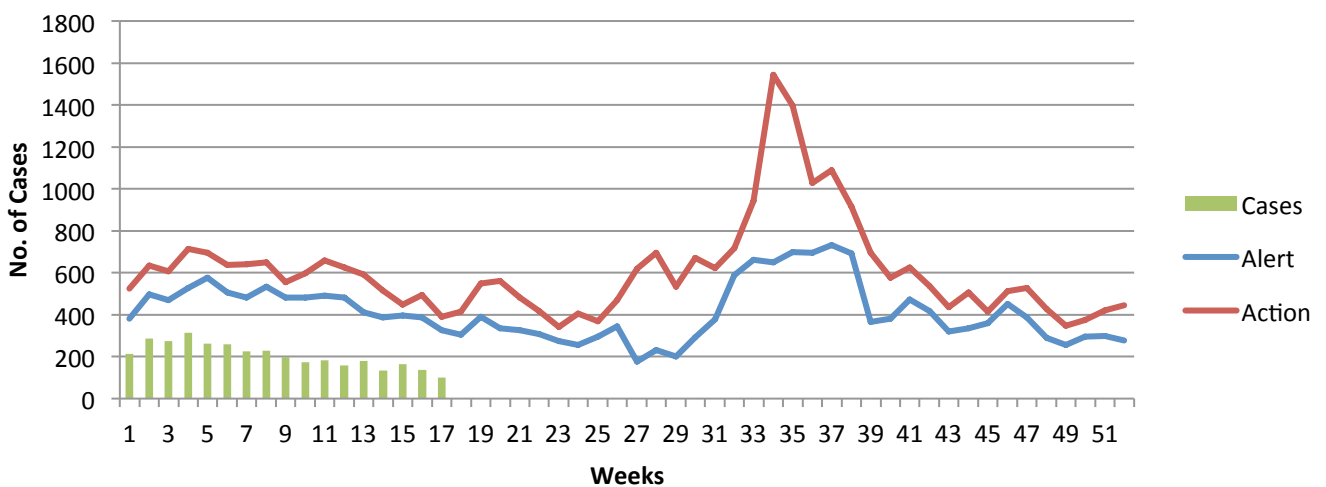

Proportion of facilities submitting surveillance reports on time to the district level for week 17: **84.6%**  
 Number of districts with a completeness of 100% for week 17: **10**

**The DHMT COORDINATOR should make sure that SOMEONE is responsible for the report for ANY given week.**

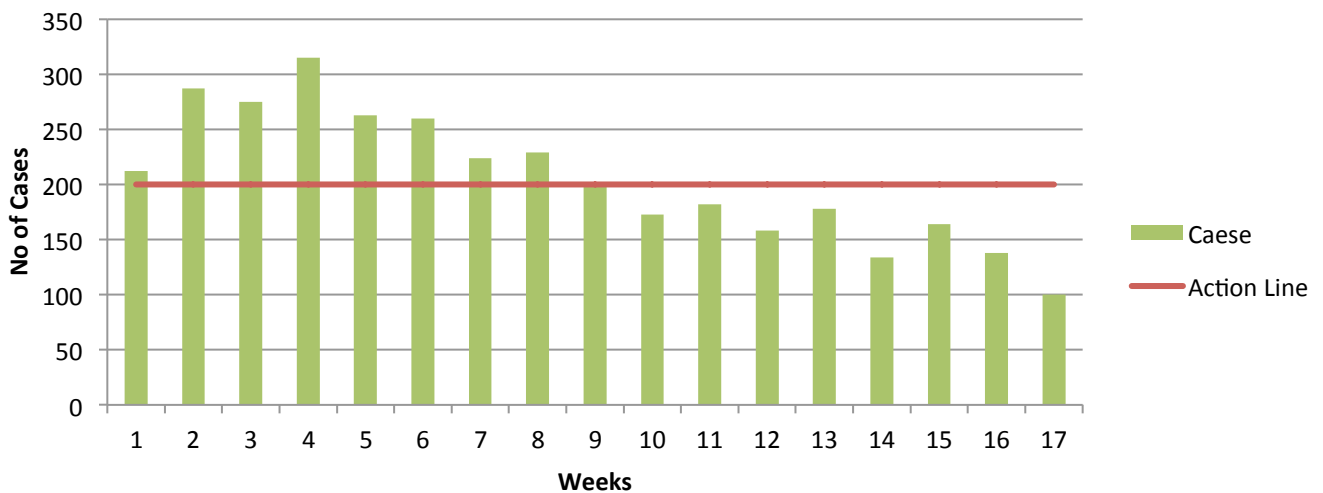

**Timeliness at National Level:** Out of the 28 districts, 21 districts reported on time. This left the timeliness of district reporting at 71.4%. We urge districts to be vigilant about sending weekly reports on time to the central level by the quickest means possible either by fax, email or phone.

**2.0 National < 5 Diarrhoea Threshold-2015**

## 6.0 Suspected Measles Cases 2015

Suspected Measles cases for week 17: 4

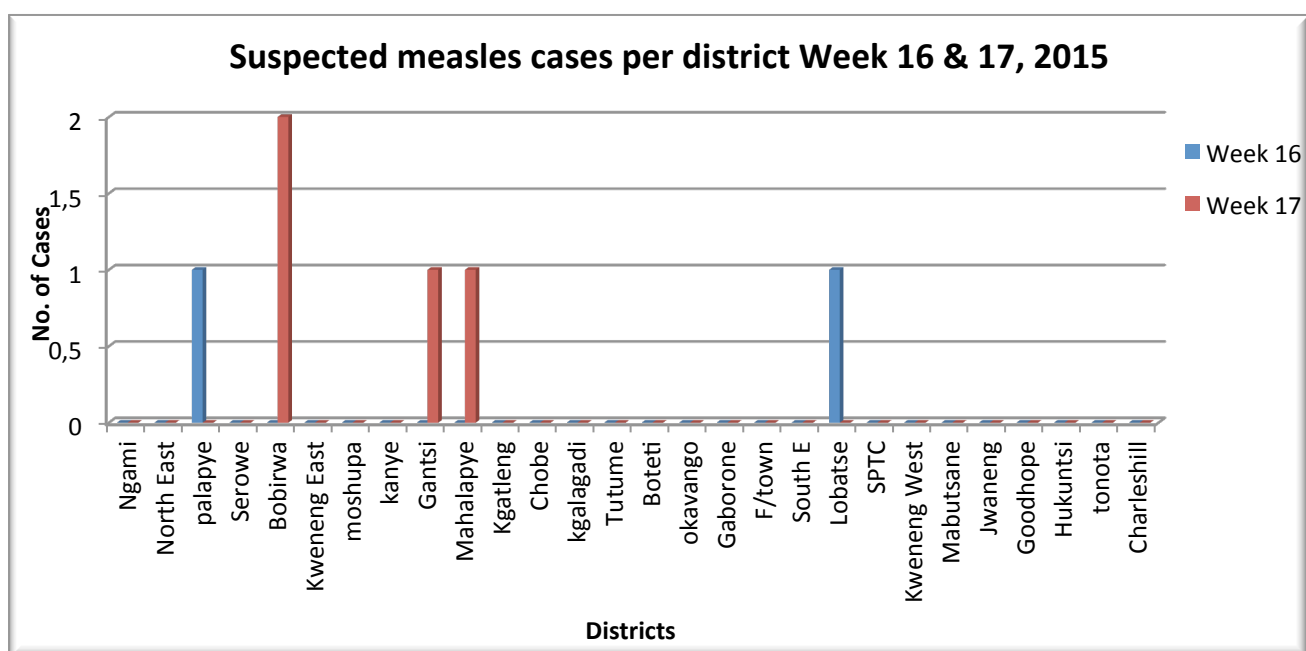

All districts suspecting measles cases should collect random samples (serum) for testing.

Districts are advised to report their cases through a line list and send this line list weekly by noon on every Wednesday to the IDSR unit via email or fax. Contact details are specified at the end of this report.
