## 3. Risk Management

These forms are designed to be used by both hospital personnel and external surveyors. The following information must be provided after each survey, before submitting the completed survey forms.

**1. NAME OF HOSPITAL/CLINIC/FACILITY:** \_\_\_\_\_

**2. BASELINE/INTERNAL SURVEY INFORMATION:**

Title and name of person who completed this document: \_\_\_\_\_

Post and position held: \_\_\_\_\_

Date of survey: \_\_\_\_\_

**3. EXTERNAL SURVEY INFORMATION:**

Name of external surveyor: \_\_\_\_\_

Date of external survey: \_\_\_\_\_

**GUIDE TO COMPLETION OF FORM**

**N.B. Hospital staff are please to use BLACK ink at all times. The external surveyors are requested to use RED ink at all times.**

Please circle the rated compliance with the criterion, e.g. NA (Not applicable), NC (Non-compliant), PC (Partially compliant), C (Compliant).

The default category affected is designated on the form for each criterion as follows:

1. patient and staff safety
2. legality
3. patient care
4. efficiency
5. structure
6. basic management
7. basic process
8. evaluation

The seriousness of the default is designated on the form for each criterion as follows:

1. mild
2. moderate
3. serious
4. very serious

# BOTSWANA NATIONAL HEALTH QUALITY STANDARDS FOR MORTUARIES/FORENSIC SERVICES

## 3.Risk Management

### 3.1 Risk Management

#### 3.1.1 Standard

*Risks are assessed and control measures introduced in order to minimise or eliminate risk.*

**Standard Intent:** Management is accountable for integrating risk management into the everyday activities of the mortuary. Every employee should be trained in and be responsible for following sound risk management practices. These include:

- Identifying areas of risk within their areas of responsibility
- Contributing to policies and procedures to reduce risk
- Monitoring the implementation of preventive measures to reduce risk
- Ensuring the efficient and effective use of resources
- Safeguarding the company's assets, and
- Participating in internal auditing procedures.

|                                                                                                                                                                                          | Criterion                                                                                | Comments        |

# BOTSWANA NATIONAL HEALTH QUALITY STANDARDS FOR MORTUARIES/FORENSIC SERVICES

## 3. Risk Management

### 3.3 Prevention and Control of Infection

#### 3.3.1 Standard

*The mortuary implements a coordinated programme to reduce the risks of infections.*

**Standard Intent:** The goal of a mortuary's infection surveillance, prevention and control programme is to identify and reduce the risks of acquiring and/or transmitting infections.

The infection control programme may differ from mortuary to mortuary, depending on the mortuary's geographic location, patient volume, patient population served, type of clinical activities and number of employees.

|                                                                                                                                                                                          | Criterion                                                                                                                                                                     | Comments        |

### 3.3.2 Standard

***Protective clothing, disinfectants and barrier techniques are available and are used correctly as required.***

**Standard Intent:** Hand washing barrier techniques and disinfecting agents are fundamental to infection prevention and control. The mortuary identifies those situations in which the use of gowns, masks and gloves is required and provides training in their correct use. Soap and disinfectants are located in those areas where hand washing and disinfecting procedures are required. Personnel are educated in proper hand washing and disinfecting procedures.

|                                                                                                                                                                              | Criterion                                                                           | Comments        |

# BOTSWANA NATIONAL HEALTH QUALITY STANDARDS FOR MORTUARIES/FORENSIC SERVICES

## 3.Risk Management

### 3.5 Fire Safety

#### 3.5.1 Standard

*The mortuary implements the fire safety plan to reduce evident fire risks.*

**Standard Intent:** Fire is an ever present risk in a health organisation. Every organisation needs to plan how it will keep its occupants safe in case of fire or smoke. An organisation plans in particular for:

- The prevention of fire through the reduction of risks such as the safe storage and handling of potentially flammable materials
- Hazards related to any construction in or adjacent to the buildings
- Safe and unobstructed means of exit in the event of a fire
- Clearly depicted fire escape routes
- Early warning and detection systems such as fire patrols, smoke detectors or fire alarms
- Inspection reports from local fire departments, and
- Suppression mechanisms such as water hoses, chemical suppressants or sprinkler systems.

The mortuary's fire safety plan identifies the:

- Frequency of inspection, testing and maintenance of fire protection and safety systems, consistent with requirements
- Process for testing, at least twice a year, the plan for the safe evacuation of the facility in the event of a fire or smoke
- Necessary education of personnel to effectively protect and evacuate the facility when an emergency occurs
- Participation of each staff member in at least one emergency preparedness test per year.

|                                                                                                                                                                                          | Criterion                                                                                                                                                                                               | Comments        |

## 3.6 Security

### 3.6.1 Standard

*The organisation provides a security service that ensures the safeguarding and protection of buildings, personnel and visitors.*

**Standard Intent:** The organisation has a responsibility to ensure that personnel and visitors are safe from attacks or theft by intruders. The health and safety committee identifies areas and groups that are vulnerable and require added security. The loss of organisation property must be prevented as far as possible through the implementation of security systems.

Security officers need to be aware of their powers and duties relating to the restriction of access to premises and the apprehension of intruders.

# BOTSWANA NATIONAL HEALTH QUALITY STANDARDS FOR MORTUARIES/FORENSIC SERVICES

## 3. Risk Management

### 3.7 Training in Health and Safety

#### 3.7.1 Standard

*The mortuary educates and trains all personnel about their roles in providing a safe and effective facility.*

**Standard Intent:** The mortuaries' personnel need to be educated and trained to carry out their roles in identifying and reducing risks, protecting others and themselves and creating a safe and secure environment.

Each organisation must determine the type and level of training for personnel, and then carry out and document a programme for this training and education. The programme can include group instruction, printed education materials, a component of new personnel orientation, or some other mechanism that meets the needs of the organisation. The programme includes instruction on the processes for reporting potential risks, reporting incidents and injuries, and handling hazardous and other materials that pose risks to themselves and others.

The organisation plans a programme designed to periodically test personnel knowledge related to emergency procedures, including fire safety procedures, the response to hazards such as the spill of a hazardous material and the use of equipment that poses a risk to personnel. Knowledge can be tested through a variety of means such as individual or group demonstrations, the staging of mock events such as an epidemic in the community, the use of written or computer tests, or other means suitable to the knowledge being tested. The organisation documents who was tested and the results of the testing.

The organisation provides training to personnel to prepare them for their roles in external or internal emergencies.
